

CLASS A FIRE-RATED STONE VENEER

SAFETY. STRENGTH. TIMELESS BEAUTY.

PROTECT WHAT MATTERS MOST

Westlake Royal Stone Solutions offers a world-class portfolio of products designed to provide peace of mind. Our Class A fire-rated architectural stone veneer deliver advanced protection against wind-blown embers, radiant heat and flames, compared to alternative cladding options. Tested by Underwriters Laboratories, Inc. for exceptional performance and safety, our products are engineered to meet strict fire-resistance standards, helping to safeguard homes and communities from the growing threat of wildfires—so you can better protect what matters most.

WHY CHOOSE CLASS A FIRE-RATED STONE VENEER?

CLASS A FIRE RATING

Certified to have surface burning characteristics of zero flame spread and zero smoke development, reducing the spread of fire hazards.

NON-COMBUSTIBLE STRENGTH

Unlike wood or other combustible materials, Class A fire-rated stone veneer will not ignite, making it a reliable choice for fire resistance.

TIMELESS DURABILITY

All of our stone products are crafted to provide years of low maintenance and beauty.

BUILD SAFER, SMARTER, & MORE BEAUTIFUL SPACES

Ideal for residential and commercial exteriors, fireplaces, accent walls, and more, our brands are trusted by builders, architects, and homeowners for their quality, aesthetics, and proven performance. Each product is crafted to deliver years of beauty and protection, enhancing curb appeal while prioritizing safety.
