## TECHNICAL INFORMATION

# INSTALLATION

Install trim over a properly prepared substrate using thin set, standard mortar or a high temperature silicone adhesive. Install with tight-fitted or  $\frac{3}{8}$ " mortared joint. **Tip** – Pre-cut pieces to known firebox opening sizes and eliminate job-site cutting. *Saves time & money. Enables quality assurance. No Call backs.* **Tip** – Installation with tight-fit joints eliminates filling & finishing, resulting in perfect joints every time. **Note:** Always check with local building codes and your fireplace manufacturer's installation instructions to ensure compliance for your area and application.

*Add Facing Material –  
Install stone veneer,  
brick or tile.*

*Install with tight-fit joints.*  
*Finished edges – no grout or cut stone  
edges to hide around firebox opening.*

## Trim Kit Convenience

*Kit contains all  
trim needed  
to surround  
your firebox  
opening, up to the  
dimensions shown  
in the chart.*

## Fireplace Trim Kit Coverage

Fireplace Trim Kit will surround an area up to the dimensions shown below.

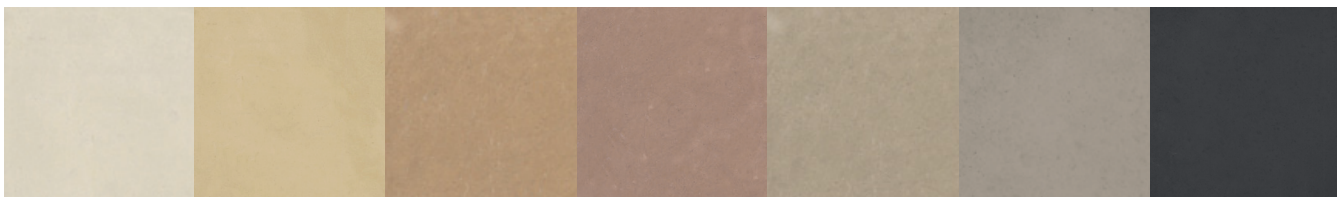

Dimensions	Tight-Fit	$\frac{3}{8}$ " Joint
A) Height	39 $\frac{1}{4}$ "	40"
B) Width w/o Keystone*	49 $\frac{1}{8}$ "	49 $\frac{7}{8}$ "
B) Width with Keystone*	52 $\frac{7}{8}$ "	54 $\frac{3}{8}$ "

\*Includes allowance for trimming universal corner return ends.

**Note:** If additional trim pieces are required, Straights and Universal Returns are sold separately by the CTN.
