

BRIKclad

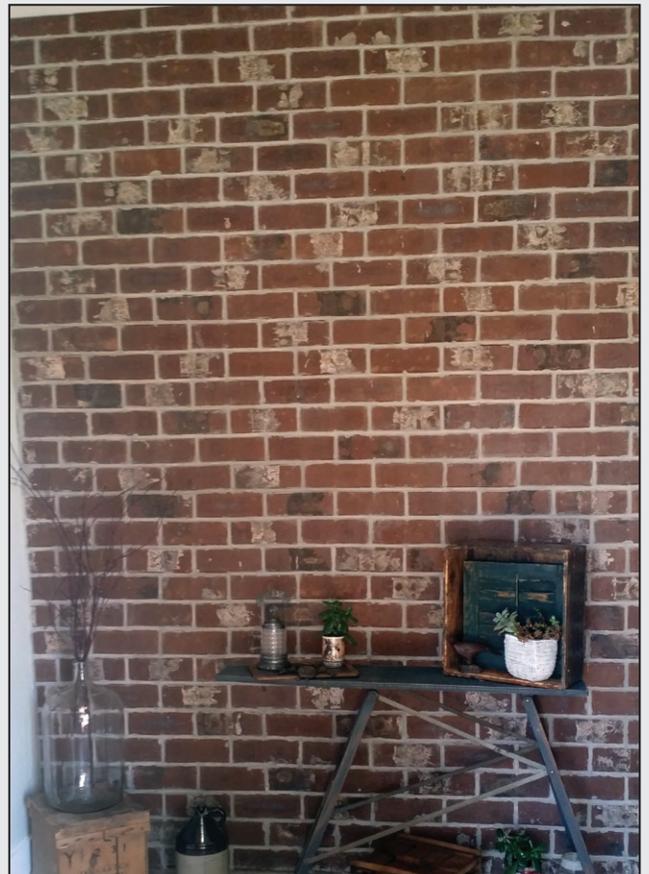

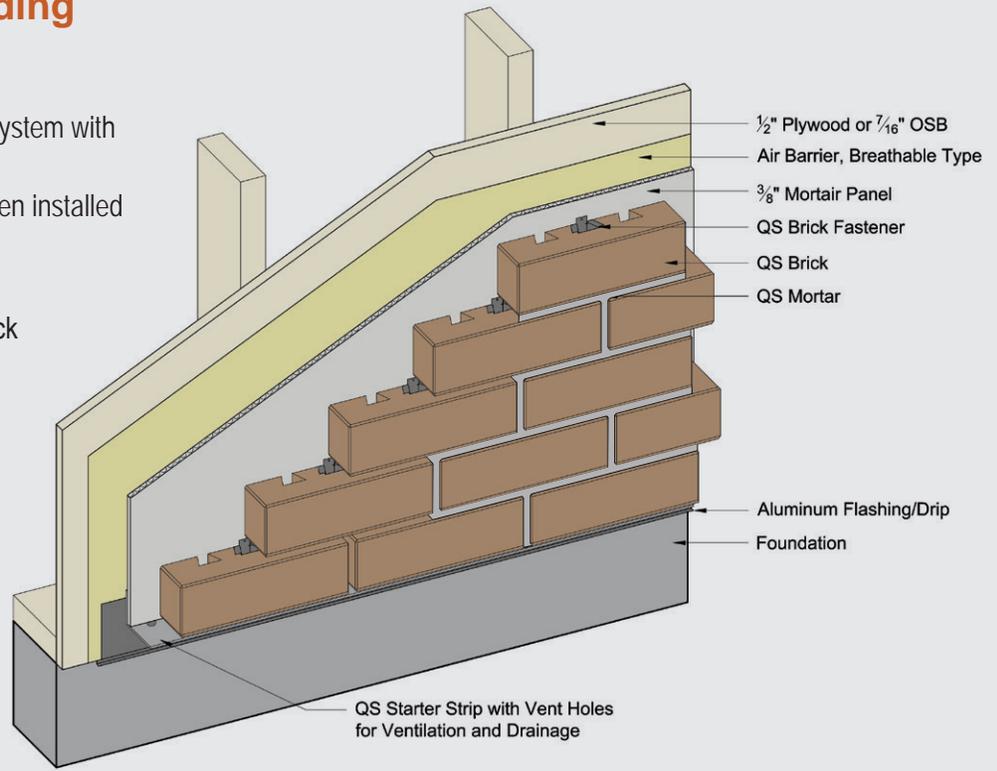

Change the way you think about brick

Durable Clay Brick Cladding

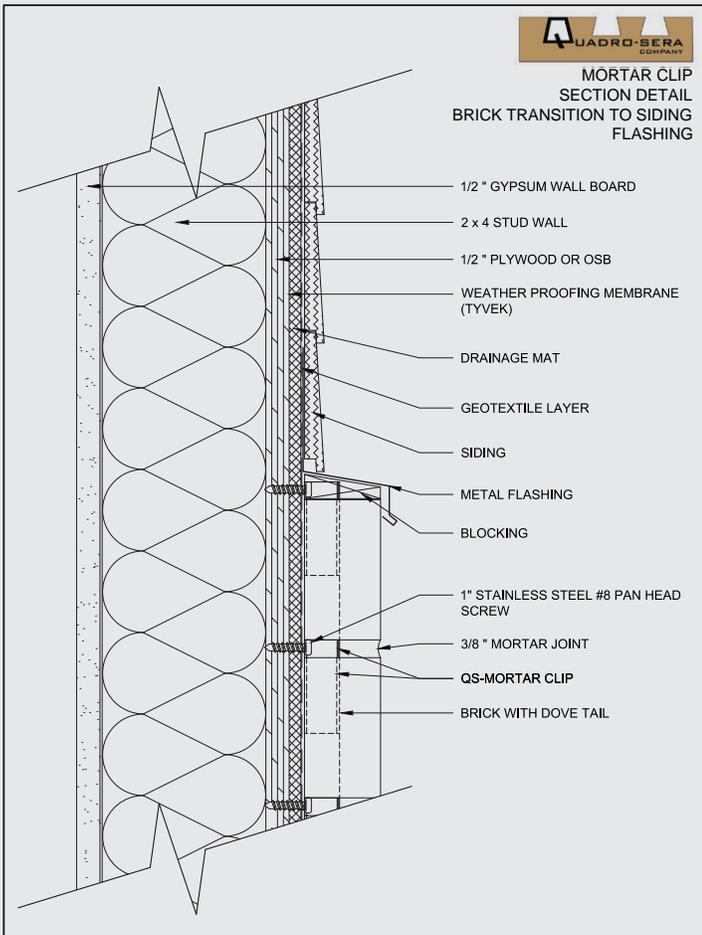

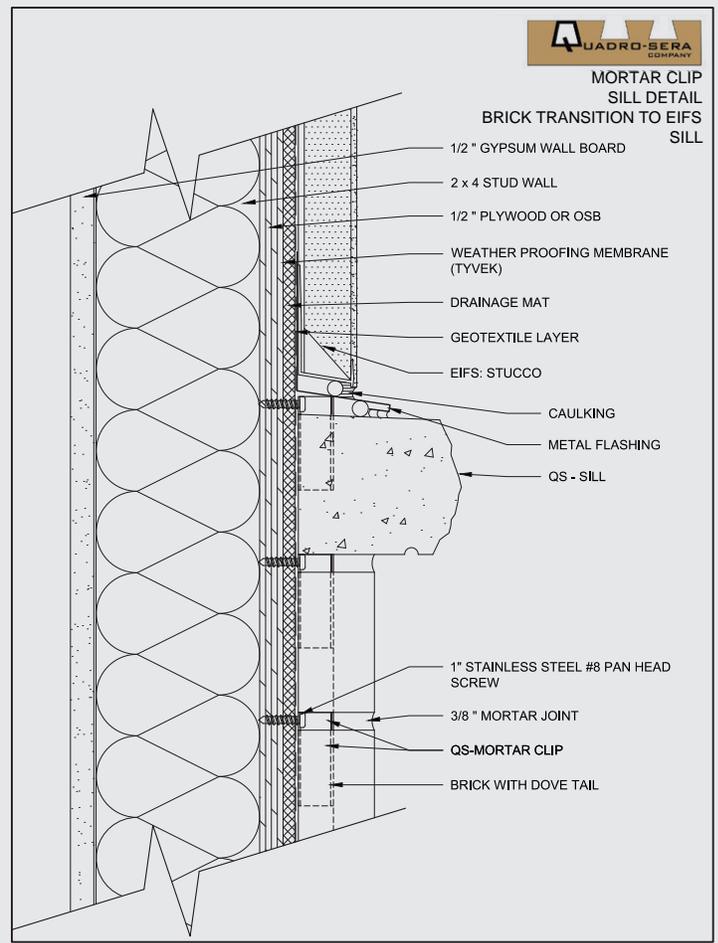

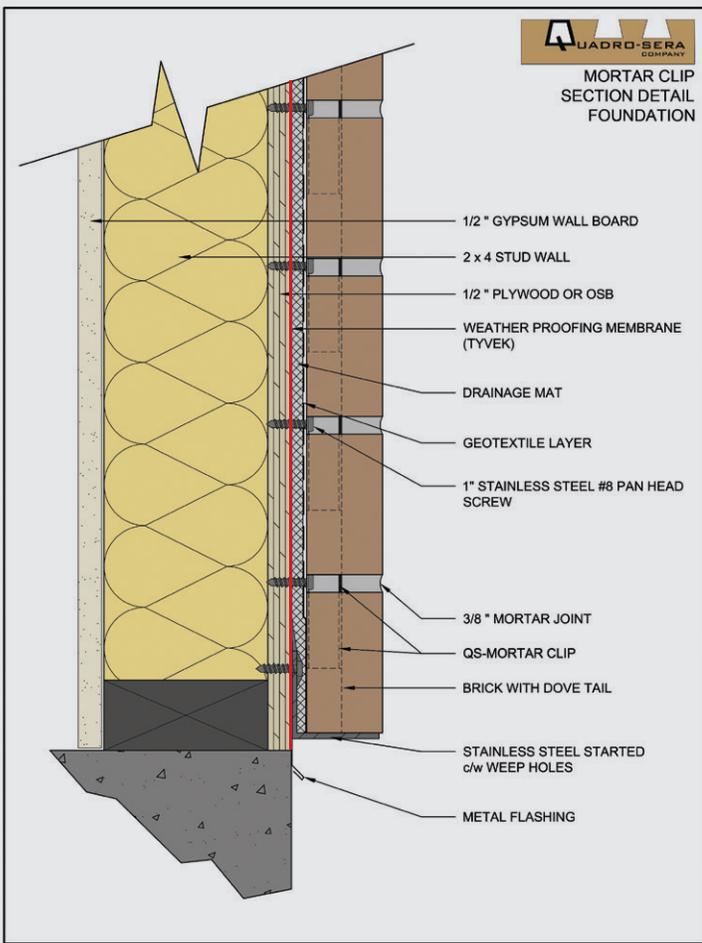

Traditional Mortared versions

- Mechanically fastened adjustable cladding system with a drainage cavity
- Install the mortar after all the bricks have been installed and adjusted
- 1.5 inches in bed-depth thickness
- Requires no maintenance to the finished brick walls and will retain the color for life
- Easily installed on all wall types for both retro-fitted buildings and for new construction
- Perfect durable base elevation product for lower wall sections below EIFS, Metal Siding and all other Siding Products
- Allows alternate sub-trades to install the product on all wall types in all weather conditions
- Uses time proven durable Clay Brick and Quadro-Sera Stainless Steel fasteners and screws
